

17th October 2011

RE: Change of Ownership of Hunter Geotechnics Tamworth Branch

Dear Valued Client,

As of Friday 14th October 2011, the lab will have a change of ownership from Hunter Geotechnics to East West Enviroag.

So who are the new owners?

East West EnviroAg is a testing laboratory located in Tamworth NSW that has been operating for over 16 years. We are proud to serve an increasingly diverse client base by providing industrial, environmental and agricultural analyses. We are committed to providing a quality analytical service through our NATA accredited lab. Additional information about our company can be found at www.ewenviroag.com.au.

Many of you would already know **Steven Mitchell** who has spent over 15 years working in Geotechnical labs, with the past 7 years as the lab manager of Hunter Geotechnics Tamworth Branch. Steve will continue to be the contact for your geotechnical requirements along with the rest of the team.

So what will change?

Hunter Geotechnics Tamworth Branch has been incorporated into our existing business East West Enviroag and we will be relocating the Testing Laboratory to our expanded premises, at 82 Plain St, in the near future.

There will be no change to the current fee schedule.

To initiate an account our credit terms are attached. If your requirements are any different please contact our office manager Anne-Marie on 02 6762 1733 or email admin@ewenviroag.com.au

Do you need to do anything?

The simple answer is no. Please continue to contact Steve and his experienced team here in Tamworth using the same telephone numbers 02 67 627123 or 0429 411933. For any other enquiries our email address is admin@ewenviroag.com.au.

Please feel free to contact us with any questions. We look forward to working with you and thank you for your continued support.

Yours faithfully,

EAST WEST ENVIROAG PTY LTD
